PROJECT

- **Face Recognition Attendance System**: Developed a Face Recognition Attendance System to automate the attendance process using facial recognition technology. The system identifies individuals by recognizing their faces and records their attendance, helping reduce manual effort and improve attendance management accuracy.
- **SMARTBUY:** SmartBuy is an e-commerce project designed to provide users with a convenient online shopping experience. The system allows users to explore products, view product details, and purchase products through an online platform. The project focuses on creating a user-friendly interface and simplifying the online shopping process.
- **SHELFIQ APP:**ShelpIQ is a Library Management Application designed to simplify and organize library operations. The application aims to make book management and library resource tracking more efficient. It focuses on improving the management of library resources and providing a convenient way to handle library-related activities.

COURSES & CERTIFICATIONS
